PROFESSIONAL SUMMARY

AI & Full Stack Engineer with extensive experience building production-grade SaaS platforms and AI-powered applications. Specialized in developing **Agentic AI systems**, **LLM-integrated workflows**, and scalable backend architectures using **FastAPI**, **Python**, and **Next.js**. Proven expertise in building RAG pipelines, intelligent automation, and enterprise-grade business platforms that combine cutting-edge AI with robust software engineering.

TECHNICAL SKILLS

- **AI & Agentic Systems:** LLM Integration (OpenAI, Anthropic), AI Agents, LangChain, LangGraph, RAG Pipelines, Prompt Engineering, Vector Databases (Pinecone/Milvus concepts), AI Automation Workflows.
- **Languages & Frameworks:** Python, TypeScript, JavaScript (ES6+), FastAPI, Node.js, React.js, Next.js.
- **Backend & Data:** RESTful APIs, JWT Authentication, RBAC, MongoDB, PostgreSQL, Supabase, SQL.
- **DevOps & Product:** Git/GitHub, Vercel, Render, CI/CD, SaaS Architecture, System Design, UI/UX Optimization.

PROFESSIONAL EXPERIENCE

AI & Full Stack Engineer | Freelance & Product Development

2025 – Present

- Built and deployed AI-powered SaaS applications and automation pipelines for production-ready business platforms.
- Developed scalable FastAPI backend systems featuring secure authentication, RBAC, and real-time analytics.
- Orchestrated end-to-end product lifecycles, from system architecture and API design to CI/CD and production scaling.
- Integrated intelligent automation systems into existing workflows, reducing manual operations for clients by 50%.

Live Content Operations Specialist | YouTube (Freelance)

Nov 2025 – Present

- Managing large-scale live streaming operations using OBS Studio with real-time technical monitoring.
- Leveraging data analytics to optimize reach and audience retention, contributing to **5,100+ watch hours**.

TECHNICAL PROJECTS

ParshBot — AI Agent & Automation Platform

AI Orchestration Framework

- Developed an AI-powered assistant platform utilizing intelligent workflows and modular automation pipelines.
- Built a FastAPI-based backend for high-speed AI task execution, dynamic prompt handling, and secure data routing.

AI-Powered Valuator Application

Intelligent Data Analytics

- Engineered an AI-driven analytics platform for automated valuation and intelligent data processing workflows.
- Designed a responsive Next.js frontend with real-time feedback loops and optimized API communication protocols.

ParshVyapar — AI-Powered GST Billing SaaS

parshvyapar.in

- Built a GST-compliant SaaS with **AI-assisted financial reporting** and automated inventory analytics for 100+ users.
- Implemented complex billing logic, stock management, and RBAC infrastructure using FastAPI and MongoDB.

Parsh Hospital ERP System

Healthcare Management Solution

- Designed a healthcare ERP with modules for EHR, pharmacy inventory, and medical workflow automation.
- Optimized PostgreSQL database operations to handle high-concurrency patient data and operational logging.

EDUCATION

Vellore Institute of Technology (VIT)

B.Tech in Electronics and Communication Engineering (CGPA: 8.58)

Bhopal, MP

2021 – 2025

MDS Public School

Class XII, CBSE (84.0%)

Udaipur, Rajasthan

2020

CERTIFICATIONS

- **VLSI Design Methodologies:** RISC-V RV32I RTL Design using Verilog HDL.
- **MATLAB Onramp:** Certified proficiency in technical computing and system simulation.
